May 17, 2018

Dear Faculty,

Our retreat last December was a success. We crafted an ambitious vision statement, formed five research teams, and set both short- and long-term goals in an effort to expand our research over the next five years.

A primary goal of the College of Pharmacy during this effort is to promote faculty collaboration in research. The intent of this directory is to serve as a resource for you. It includes research areas and teams of faculty members, as well as self-identified opportunities for collaboration.

My hope is that this information will be useful to you as you search for faculty members with whom your research interests and areas of opportunities align. Thank you for your commitment to our college and to excellence in research.

Sincerely,
CONTENTS

Research Vision ........................................ 4

Research Teams

Cancer ........................................... 5–6
Infectious Diseases ......................... 7–8
Neuroscience ................................. 9–10
Scholarship of Teaching & Learning  . 11–14
Vascular Diseases ......................... 15–18
Our thriving culture of scholarship drives us to be a leader of interdisciplinary and innovative research in therapeutic discovery, application, and education to improve health in Georgia and beyond.
MICHAEL BARTLETT, PH.D.

Research Areas: Methods to determine therapeutic agents, metabolites and degradation products from biological and non-biological matrices; oligonucleotide therapeutics & biomarkers

Opportunities for Collaboration: DMPK studies of therapeutic agents; assessment of biomarkers for diseases

mgbart@uga.edu

HOUJIAN CAI, PH.D.

Research Areas: Protein acylation in cancer progression, fatty acylation metabolism, drug discovery on inhibition of N–myristoyltransferases, stromal–epithelial crosstalk in prostate stem cells

Opportunities for Collaboration: Drug delivery, medicinal chemistry for drug development, protein quantification by mass spectrometry

caihj@uga.edu

AMBER CLEMMONS, PHARM.D.

Research Areas: Supportive care, hematologic malignancies, adult bone marrow transplantation and Scholarship of Teaching and Learning

Opportunities for Collaboration: Malignant hematology, immunocompromised infectious diseases and cellular transplantation

aclemmons@augusta.edu

EWAN COBRAN, PH.D.

Research Areas: Health services and disparities; comparative effectiveness; cancer screening, prevention and outcomes; community-based participatory research; patterns of care; nativity; and large data analysis

Opportunities for Collaboration: Health informatics, health outcomes research, cancer survivorship, genomics, health disparities, health literacy and communication

ecobran@uga.edu

BRIAN CUMMINGS, PH.D.

Research Areas: Molecular mechanisms in cell death, specifically role of lipids and water disinfection byproducts

Opportunities for Collaboration: Medicinal chemistry and small molecule cancer screening assays; nanoparticle formulation and drug delivery; lipidomic analysis of post–disease tissues

briancsc@uga.edu

EILEEN KENNEDY, PH.D.

Research Areas: Design of allosteric inhibitor compounds targeting kinase activation and signaling

Opportunities for Collaboration: Kinase signaling and disease

ekenne@uga.edu
**CANCER**

**Research Team**

**DEXI LIU, PH.D.**

**Research Areas:** Gene/protein as a drug for prevention and treatment of obesity, diabetes, cancer, and other diseases

**Opportunities for Collaboration:** Gene therapy, obesity research, drug delivery and protein drug discovery

*dliu@uga.edu*

---

**MANDI MURPH, PH.D.**

**Research Areas:** Molecular mechanisms to prevent chemoresistance or prolong remission by extending time until chemoresistance develops in mammalian cells

**Opportunities for Collaboration:** Chemistry

*mmurph@uga.edu*

---

**ARTHUR ROBERTS, PH.D.**

**Research Areas:** Drug interactions and multidrug resistance transporter

**Opportunities for Collaboration:** Labs with innovative experimental/computational approaches applicable to MDR transporter; translating *in vitro* studies with labs with animal and clinical experiments with MDR transporter

*audie@uga.edu*

---

**SOMANATH SHENOY, PH.D.**

**Research Areas:** Molecular mechanisms regulating vascular permeability, angiogenesis, integrin activation, extracellular matrix remodeling and tumor growth

**Opportunities for Collaboration:** Assistance with statistical analysis for protocol approvals, research data analysis, and grant applications

*sshenoy@augusta.edu*

---

**MAY XIONG, PH.D.**

**Research Areas:** Drug delivery and pharmaceutics, specifically the design of macromolecules to improve iron chelation therapy and strategies to combat multi-drug resistance in bacteria

**Opportunities for Collaboration:** Any area in which drug delivery is a challenge

*mayxiong@uga.edu*

---

**Y. GEORGE ZHENG, PH.D.**

**Research Areas:** Epigenetic therapies and chemical biology strategies and probes to interrogate protein acetylation– and methylation regulated disease processes

**Opportunities for Collaboration:** With those who have specialized expertise in pharmacology, such as MS and proteomics

*yzheng@uga.edu*
CHRISTOPHER BLAND, PHARM.D.

Research Areas: Critical care, Infectious Diseases, drug dosing in obesity, antimicrobial stewardship

Opportunities for Collaboration: Synergy and collaboration among faculty who research in critical care or Infectious Diseases areas

cmbland@uga.edu

DANIEL CHASTAIN, PHARM.D.

Research Areas: HIV/AIDS, opportunistic infections, antimicrobial resistance, and antimicrobial stewardship

Opportunities for Collaboration: Co-investigators with shared research interests

daniel.chastain@uga.edu

VIRGINIA FLEMING, PHARM.D.

Research Areas: Clinical pharmacy practice in adult internal medicine and Infectious Diseases

Opportunities for Collaboration: Between ID pharmacists on different campuses with clinical research projects

gin13@uga.edu

J. RUSSELL MAY, PHARM.D.

Research Areas: Drug policy development and management, allergic rhinitis, Infectious Diseases, and evaluation of new drugs

Opportunities for Collaboration: With masters students working on clinical projects

jmay@augusta.edu

CORY MOMANY, PH.D.

Research Areas: Application of atomic structures to biological and pharmaceutical problems using molecular biology, biochemistry, structure-based drug discovery and macromolecular X-ray crystallography

Opportunities for Collaboration: RNA structural studies (non-coding and small RNA) and RNA/protein complexes, antibiotic resistance (bacterial) mechanisms, bacterial antibiotic discovery, efficient cloning, large-scale protein production, any kind of X-ray crystallography problem and bacterial transcriptional studies

cmomany@uga.edu

SCOTT PEGAN, PH.D.

Research Areas: Regulation of the human innate immune system; discovery of new therapeutics for nerve and pesticide agent poisoning; discovery of new antibiotics for use against TB

Opportunities for Collaboration: Infectious Diseases

spegan@uga.edu
BRIAN SEAGRAVES, PHARM.D.

Research Areas: Treatment and care of HCV- and HBV-infected patients

Opportunities for Collaboration: Partnering with social work faculty; Scholarship of Teaching & Learning

cgraves@uga.edu

SOMANATH SHENOY, PH.D.

Research Areas: Molecular mechanisms regulating vascular permeability, angiogenesis, integrin activation, extracellular matrix remodeling and tumor growth

Opportunities for Collaboration: Assistance with statistical analysis for protocol approvals, research data analysis, and grant applications

sshenoy@augusta.edu

REBECCA STONE, PHARM.D.

Research Areas: Contraception, medication use during pregnancy and medication adherence

Opportunities for Collaboration: Between clinical practice faculty and PSHOP researchers

rhstone@uga.edu

EVA-MARIE STRAUCH, PH.D.

Research Area: Protein design and engineering, design of anti-virals and immunogens, immunoinformatics, protein chemistry and re-purposing of viral surface proteins, computational biology

Opportunities for collaborations: Vaccine design, protein-based therapeutics, protein mediated drug delivery

estrauch@uga.edu

CATHERINE WHITE, PH.D.

Research Areas: Pharmacokinetics of new investigational therapeutic agents/environmental toxins including both in vitro and in vivo testing; analysis of data to generate pharmacokinetic parameters; bioanalytical analysis; stability testing, brain disposition of compounds; drug metabolism and educational research

Opportunities for Collaboration: Toxicology, preclinical evaluation of new therapeutic agents or formulations, drug delivery, medicinal chemistry, brain disposition of compounds, and educational research

cwhite44@uga.edu

MAY XIONG, PH.D.

Research Areas: Drug delivery and pharmaceutics, specifically the design of macromolecules to improve iron chelation therapy and strategies to combat multi-drug resistance in bacteria

Opportunities for Collaboration: Any area in which drug delivery is a challenge

mayxiong@uga.edu
**RENAH ABU-SAWWA, PHARM.D.**

**Research Areas:** Pediatrics, Neurology (e.g. epilepsy) and Scholarship of Teaching and Learning

**Opportunities for Collaboration:** Pediatric or neurology practice-based research and education in didactic and experiential curriculum with emphasis on development of soft skills and interprofessional collaboration

[Email](rabusawwa@augusta.edu)

---

**SHELLEY HOOKS, PH.D.**

**Research Areas:** Molecular mechanisms by which cellular signaling regulates cell function and how mechanisms go awry in cancer and central nervous system disorders

**Opportunities for Collaboration:** Sharing instrumentation; molecular techniques

[Email](shooks@uga.edu)

---

**JAYANI JAYAWARDHANA, PH.D.**

**Research Areas:** Health economics, health policy, pharmaceutical economics, substance use, prescription drugs and large secondary data analysis

**Opportunities for Collaboration:** Health economics, health policy and health services research

[Email](jayaward@uga.edu)

---

**PRIYA NARAYANAN, PH.D.**

**Research Areas:** Mechanisms of neuro-vascular injury in retina, diabetic retinopathy and optic neuritis

**Opportunities for Collaboration:** Neurovascular diseases of the eye

[Email](pnarayanan@augusta.edu)

---

**MERRILL NORTON, PHARM.D.**

**Research Areas:** Pharmacy-related addiction topics: neurobiology of addiction and psychotropic disorders with specialty areas of addiction medications, psychiatric and pain management medications

**Opportunities for Collaboration:** Substance use disorders and their treatments, effective pain management in addicted patients, and use of legalized cannabis for pain

[Email](mernort@uga.edu)

---

**MATTHEW PERRI, PH.D.**

**Research Areas:** Pharmaceutical marketing, policy analysis and health economics using data

**Opportunities for Collaboration:** With clinicians focused on specific diseases where marketing and economics are driving patient care decisions and with health economists focused on complex modeling and analysis

[Email](mp3@uga.edu)
MAY XIONG, PH.D.

Research Areas: Drug delivery and pharmaceutics, specifically the design of macromolecules to improve iron chelation therapy and strategies to combat multi-drug resistance in bacteria

Opportunities for Collaboration: Any area in which drug delivery is a challenge

mayxiong@uga.edu

JASON ZASTRE, PH.D.

Research Areas: Impact of vitamin B1 on cancer progression

Opportunities for Collaboration: Techniques or expertise found in another lab

jzastre@uga.edu
RENAD ABU-SAWWA, PHARM.D.

**Research Areas:** Pediatrics, Neurology (e.g. epilepsy) and Scholarship of Teaching and Learning

**Opportunities for Collaboration:** Pediatric or neurology practice-based research and education in didactic and experiential curriculum with emphasis on development of soft skills and interprofessional collaboration

rabusawwa@augusta.edu

KAY BROOKS, M.ED., R.PH.

**Research Areas:** Experiential education, simulation/standardized patients, motivational interviewing, SBIRT

**Opportunities for Collaboration:** Interprofessional education, simulation/standardized patients and Scholarship of Teaching & Learning

klbrooks@uga.edu

ANDREW DARLEY, PHARM.D.

**Research Areas:** Experiential education, health system pharmacy practice, pharmacy residency training, and internal medicine

**Opportunities for Collaboration:** Scholarship of Teaching & Learning and practice-based research

badarley@uga.edu

DUC DO, PH.D.

**Research Areas:** Scholarship of Teaching & Learning, particularly in area of PharmD admissions and academic support services

**Opportunities for Collaboration:** Scholarship of Teaching & Learning

duc.do@uga.edu

WARREN BEACH, PH.D.

**Research Areas:** Relationship between PCAT performance and performance in courses requiring math skills and those requiring application of knowledge or critical thinking

**Opportunities for Collaboration:** Enhance learning and retention throughout curriculum; applying basic pharmaceutical sciences to clinical practice

wbeach@uga.edu

LORI DUKE, PHARM.D.

**Research Areas:** Experiential learning and student professional development

**Opportunities for Collaboration:** Within experience learning and among experiential faculty from other institutions

ljduke@uga.edu
SCHOLARSHIP OF TEACHING & LEARNING

Research Team

DEBORAH ELDER, PH.D.

Research Areas: Pharmaceutical products, beyond-use-dating of compounded non-sterile pharmaceuticals, drug formulation for individualized care and technology in pharmacy education

Opportunities for Collaboration: Specialized dosage form preparations for human/veterinary trials, optimization of care with individualized pharmaceutical dosage forms and technology use to improve student learning

dlstrong@uga.edu

MICHAEL FULFORD, PH.D.

Research Areas: Educational policy, assessment of learning, curriculum review/design, accreditation program review, student development theory, admissions and enrollment management, co-curricular activities, instructional design, strategic planning, intercollegiate athletics, academic support, embedded assessment

Opportunities for Collaboration: Assessment of interprofessional education, co-curricular activities, accreditation and self-study development, predictors of student performance, pharmacist’s patient care process, assessment of affective domains and professionalism

mfulford@uga.edu

ASHLEY HANNINGS, PHARM.D.

Research Areas: Ambulatory care, community pharmacy, diabetes, entrepreneurship, immunizations and Scholarship of Teaching & Learning

Opportunities for Collaboration: Scholarship of Teaching & Learning, practice-based research and ambulatory care

ahanning@uga.edu

KEITH HERIST, PHARM.D.

Research Areas: Scholarship of Teaching & Learning

Opportunities for Collaboration: Scholarship of Teaching & Learning

kherist@uga.edu

JOHANNA HodGES, M.ED., M.S.

Research Areas: Active engagement of students with online programs, development of digital multimedia learning, online accessibility issues, distance learning administration

Opportunities for Collaboration: Multimedia learning for emergency preparedness, veterinary medicine, and public health; multidisciplinary collaboration

jhodges@uga.edu

LINDA LOGAN, PHARM.D.

Research Areas: Leadership, experiential and interprofessional education, hospital-based practice and efficacy of interprofessional teams in “whole person care”

Opportunities for Collaboration: Currently collaborating with UNC, UGA Counseling and Human Development Department and Experiential Education faculty

ldlogan@uga.edu
SCHOLARSHIP OF TEACHING & LEARNING
Research Team

DIANNE MAY, PHARM.D.
Research Areas: Drug information services, policy development and formulary management, literature evaluation, gastroesophageal reflux disease, adverse drug reactions
Opportunities for Collaboration: Pharmaceutical health services, outcomes and policy
dimay@augusta.edu

ANNE MISHER, PHARM.D.
Research Areas: Ambulatory care services, chronic care management, transitions of care and diabetes
Opportunities for Collaboration: Within disease states and mentorship from senior faculty to junior faculty
amisher@uga.edu

SHARMON OSAE, PHARM.D.
Research Areas: Improvement in quality measures, optimization of medication management among geriatric, and assessment of clinical pharmacy trainee perceptions
Opportunities for Collaboration: Population health projects (i.e., text interventions or multi-site studies)
sharmon.osae@uga.edu

BETH PHILLIPS, PHARM.D.
Research Areas: Ambulatory care pharmacy practice and residency training
Opportunities for Collaboration: Scholarship of Teaching & Learning, including residency training and the pharmacists’ patient care process; ambulatory care pharmacy practice
bbp@uga.edu

GURVINDER SINGH REKHI, PH.D.
Research Areas: Formulation development, pharmaceutical dosage forms, clinical supplies, CMC, regulatory submissions, transfer technology, patents
Opportunities for Collaboration: Research and development projects requiring: drug delivery, nanotechnology, controlled release, abuse-deterrent opioid formulations, GMP/GLP Training, Pharmaceutical/Biotechnology Manufacturing and Analytical Laboratory Student Training
gsrekhi@uga.edu

MELODY SHEFFIELD, PHARM.D.
Research Areas: Evaluation and feedback provided to pharmacy students on experiential rotations; inpatient geriatrics
Opportunities for Collaboration: Evaluation of P4 students and geriatrics
rx@uga.edu
SCHOLARSHIP OF TEACHING & LEARNING

Research Team

TRINA VON WALDNER, PHARM.D.

Research Areas: Public health initiatives, caring for vulnerable populations and continuing professional development

Opportunities for Collaboration: Student development, online course evaluation, public health topics like opioid epidemic and access to care, clinical and translational research

tvonwald@uga.edu

LINDSEY WELCH, PHARM.D.

Research Areas: Pharmacy experiential education including student/preceptor development, intervention and assessment

Opportunities for Collaboration: Patient outcomes and student professionalism

lhwelch@uga.edu

MISHA THOMASON WATTS, PHARM.D.

Research Areas: Experiential education, health system pharmacy practice, geriatrics, internal medicine and residency preparation

Opportunities for Collaboration: Scholarship of Teaching & Learning and practice-based research

mthomas02@uga.edu

CATHERINE WHITE, PH.D.

Research Areas: Pharmacokinetics of new investigational therapeutic agents/environmental toxins including both in vitro and in vivo testing; analysis of data to generate pharmacokinetic parameters; bioanalytical analysis; stability testing, brain disposition of compounds; drug metabolism and educational research

Opportunities for Collaboration: Toxicology, preclinical evaluation of new therapeutic agents or formulations, drug delivery, medicinal chemistry, brain disposition of compounds, and educational research

cwhite44@uga.edu

mthomas02@uga.edu

CATHERINE WHITE, PH.D.

Research Areas: Pharmacokinetics of new investigational therapeutic agents/environmental toxins including both in vitro and in vivo testing; analysis of data to generate pharmacokinetic parameters; bioanalytical analysis; stability testing, brain disposition of compounds; drug metabolism and educational research

Opportunities for Collaboration: Toxicology, preclinical evaluation of new therapeutic agents or formulations, drug delivery, medicinal chemistry, brain disposition of compounds, and educational research

cwhite44@uga.edu
TRISHA BRANAN, PHARM.D.

Research Areas: Sepsis complications, issues in Infectious Diseases, critical care education, innovative teaching methods and interprofessional education

Opportunities for Collaboration: Vascular and hemodynamic changes in sepsis; Scholarship of Teaching & Learning

tbranan@uga.edu

DANIEL CHASTAIN, PHARM.D.

Research Areas: HIV/AIDS, opportunistic infections, antimicrobial resistance, and antimicrobial stewardship

Opportunities for Collaboration: Co-investigators with shared research interests

daniel.chastain@uga.edu

SUSAN FAGAN, PHARM.D.

Research Areas: Stroke pharmacotherapy, animal models of ischemic stroke, hemorrhagic transformation, vascular protection after stroke, angiogenesis after stroke and stroke outcomes

Opportunities for Collaboration: Stroke research

sfagan@uga.edu

DUSKA FRANIC, PHARM.D., PH.D.

Research Areas: Patient-reported outcomes, quality of life, preference and utility measurement and pharmacoeconomics in various chronic conditions

Opportunities for Collaboration: Health outcomes research in clinical trials

dfranic@uga.edu

PHIL GREENSPAN, PH.D.

Research Areas: Health benefits of nutraceuticals and functional foods and effect of select natural extracts on inflammation, protein glycation and LDL oxidation

Opportunities for Collaboration: Labs interested in studying the mechanisms of atherosclerosis and diabetic complications

greenspn@uga.edu

ANTHONY HAWKINS, PHARM.D.

Research Areas: Choice of IV fluids, fluid resuscitation and hemodynamic monitoring

Opportunities for Collaboration: Critical care practice-based research, critical care education in the didactic and experiential curriculum

hawkins@uga.edu
ANNE MISHER, PHARM.D.

**Research Areas:** Ambulatory care services, chronic care management, transitions of care and diabetes

**Opportunities for Collaboration:** Within disease states and mentorship from senior faculty to junior faculty

amisher@uga.edu

susan.smith@uga.edu
HENRY YOUNG, PH.D.

Research Areas: Patient medication use to improve quality of life and health outcomes with a special interest in health services and outcomes in underserved and minority patient populations.

Opportunities for Collaboration: Different contexts (e.g., medical conditions, diverse populations); areas of asthma, pain and cardiovascular disease.

hnyoung@uga.edu
