Decision Tree
Instructor Response to COVID-19 Case

If a student in a class you are teaching

- Is experiencing symptoms consistent with COVID-19, OR
- Learns they have a positive test result for COVID-19

Instructor should send sick student home and notify the student they will not allowed to attend class in-person until cleared to return.

Instructor should notify student to report symptoms/result to DawgCheck.

Instructor should recommend student follow Decision Tree for College of Pharmacy Students and DawgCheck recommendations.

Instructor should communicate with course coordinator and Campus Contact (Athens – Duc Do; Augusta – Susan Fagan; Albany – Melody Sheffield; Savannah – Ken Duke) about the situation.

Campus Contact will

- Communicate with COP COVID-19 Operational Leadership Team (COLT) to determine if further action is needed (i.e., additional reporting, facility cleaning). The primary COLT contact for instructional matters is Dr. Do.
- Work with student to determine when return-to-campus criteria are met and the student can be cleared to return.
- Notify course coordinator/ appropriate faculty when student is eligible to return to campus.
