

Phoebe is nationally recognized for clinical excellence and innovative community health programs.

About Phoebe

Phoebe Putney Health System is a not-for-profit network of more than 4,500 physicians, nurses, professional staff, and volunteers. We deliver compassionate, high quality healthcare to more than 500,000 residents in our 35-county region. Phoebe is dedicated to providing a better way to health and wellness for our entire community.

We are a recognized leader in specialties including cardiovascular medicine, oncology, orthopaedics, and women's health; and we offer patients the most advanced diagnostic and therapeutic treatments available.

Phoebe also operates Phoebe Physicians, a self-governing, not-for-profit network that includes clinics and hospital-based physicians representing a wide range of medical specialties. Through our facilities, physician network, and innovative partnerships, we bring state-of-the-art medicine to Georgia's hometowns.

Program Goals

The goals of Phoebe's residency program are the development of clinical pharmacists responsible for medication-related care of patients with a wide range of conditions, prepared to be future leaders, well-prepared for board certification and postgraduate year two (PGY2) pharmacy residency training. This residency is jointly administered by Phoebe Putney Memorial Hospital and the University of Georgia College of Pharmacy.
