

LOOKING FOR GRADUATE/PROFESSIONAL HEALTHCARE EDUCATION FROM THE UNIVERSITY OF GEORGIA?

UNIVERSITY OF GEORGIA
College of Pharmacy

<https://rx.uga.edu> /ugapharmacy

Yes! What are my options?

Yes! But I can't attend graduate school full-time or in-person.

Want to be on the frontlines of patient care?

Maybe. What else is there?

Want to see the impact of your research on patient care?

Maybe. What else is there?

Want to make a groundbreaking drug discovery?

Yes! Tell me which program fits best.

Yes!

Yes!

REGULATORY SCIENCES (MS/Cert)

Learn to develop/manufacture/register effective medical products with the FDA including conducting clinical trials.

DOCTOR OF PHARMACY (PharmD)

Become a patient-centered medication expert, managing and preventing drug-related issues.

CLINICAL & ADMINISTRATIVE PHARMACY (MS/PhD)

Conduct preclinical, clinical, and public health research to improve patient well-being.

PHARMACEUTICAL & BIOMEDICAL SCIENCES (MS/PhD)

Focus on research like drug discovery and therapeutics for treating disease.

Students with a completed BS degree can add an online Regulatory Sciences Certificate to any graduate/professional program!

WHY CHOOSE THE COLLEGE OF PHARMACY?

- From the Doctor of Pharmacy professional degree to graduate and certificate programs in Clinical & Administrative Pharmacy, Pharmaceutical & Biomedical Sciences, and International Biomedical Regulatory Sciences, our industry-leading research faculty and practitioners draw top students (like you!) from around the world.
- You will learn in one of the most diverse student bodies at UGA with caring faculty and staff dedicated to respect for all.
- The UGA College of Pharmacy is committed to creating a healthy future by proudly serving and supporting communities across Georgia and the nation through experiential learning and community service efforts.

Once you have made the decision to go to graduate or professional school, the next step is to research programs that match your interests and fit your needs.
