

The 2024 Chu Lectureship

DR. ANABELLA VILLALOBOS

*Senior Vice President
Head of Biotherapeutics and
Medicinal Sciences
Biogen*

Dr. Villalobos, who is internationally recognized for her leadership in drug discovery and medicinal sciences, will present, “Therapeutic Modalities for Neurological and Rare Diseases.”

Before joining Biogen, Dr. Villalobos was the Vice President of Medicinal Synthesis Technologies and Neuroscience Medicinal Chemistry at Pfizer. There, she designed Icopezil, a drug that advanced to Phase Two clinical trial, eventually leading to the creation of Aricept, the front-line treatment for Alzheimer’s Disease. Dr. Villalobos is a 2023 inductee into the American Chemical Society Medicinal Chemistry Hall of Fame.
