THE UNIVERSITY OF GEORGIA "2+4" BS & PHARMD DUAL DEGREE PROGRAM

Students interested in pharmacy with a foundation in pharmaceutical and biomedical sciences have a guided pathway, combining a Bachelor of Science in Pharmaceutical and Biomedical Sciences (BSPBS) with a Doctor of Pharmacy (PharmD). The Pharmaceutical and Biomedical Sciences BS/PharmD program allows students to complete the program in six years. The goal of this degree is to create pharmacists who possess a deeper understanding of the pharmaceutical and biomedical sciences in order enhance their ability to be part of the emerging healthcare team model.

Year 1: Students meet with their academic advisor and express interest in pursuing the 2+4 BS/PharmD dual degree.

Year 3: Students begin PharmD Program, if admitted.

Year 4: Students graduate with their BS in Pharmaceutical and Biomedical Sciences, with an emphasis in Biomedical Sciences.

Years 1-2

In the first two years, students complete pre-pharmacy course requirements in the Pharmaceutical and Biomedical Sciences program in the College of Pharmacy.

Years 3-6

In years three through six, students complete a Bachelor's degree in Pharmaceutical and Biomedical Sciences, with an emphasis in Biomedical Sciences. They will continue in the PharmD curriculum to prepare them for a future as a licensed pharmacist.

Year 2: Students apply to the PharmD program. If accepted, students then apply to the 2+4 BS/PharmD pathway through their advisor.

Year 6: Students graduate with their PharmD degree.
